

CanGulf Engineering FZC.

Pump Supply, Motor Supply, & Gear Boxes Supply & Installation

- ➔ **All types of Motor, Gearboxes , Pumps sales and service.**
- ➔ **All type of Electrical Motor Control Panels sales and service.**
- ➔ **Preventive Maintenance Contracts.**
- ➔ **Maintenance audit Reports and Documentation services.**

Objective

CanGulf Engineering aims is to provide state of the art technological & customized solutions for its clients. To undertake turnkey projects to provide the customers with the design, manufacturing, supply, installation and commissioning of various kinds of electrical and electronic systems and controls, by utilizing finest materials and equipment.

To satisfy the requirements of the customers in trade and advisory for engineering products, machinery and allied equipment, including hardware and software required for monitoring.

To import, export, supply, install & commission the above in line with the best practices in the engineering industry and according to the relevant international standards (such as ISO, BS, IEC, IEEE, ASTM, ASME, API, AGA etc.)

Our Team

The planning and execution is carried out from our office where the expertise in organizing, planning and control is available from our staff who have a combined management experience in planning, operations, maintenance, & quality control of heavy and light engineering industry of more than 75 years .

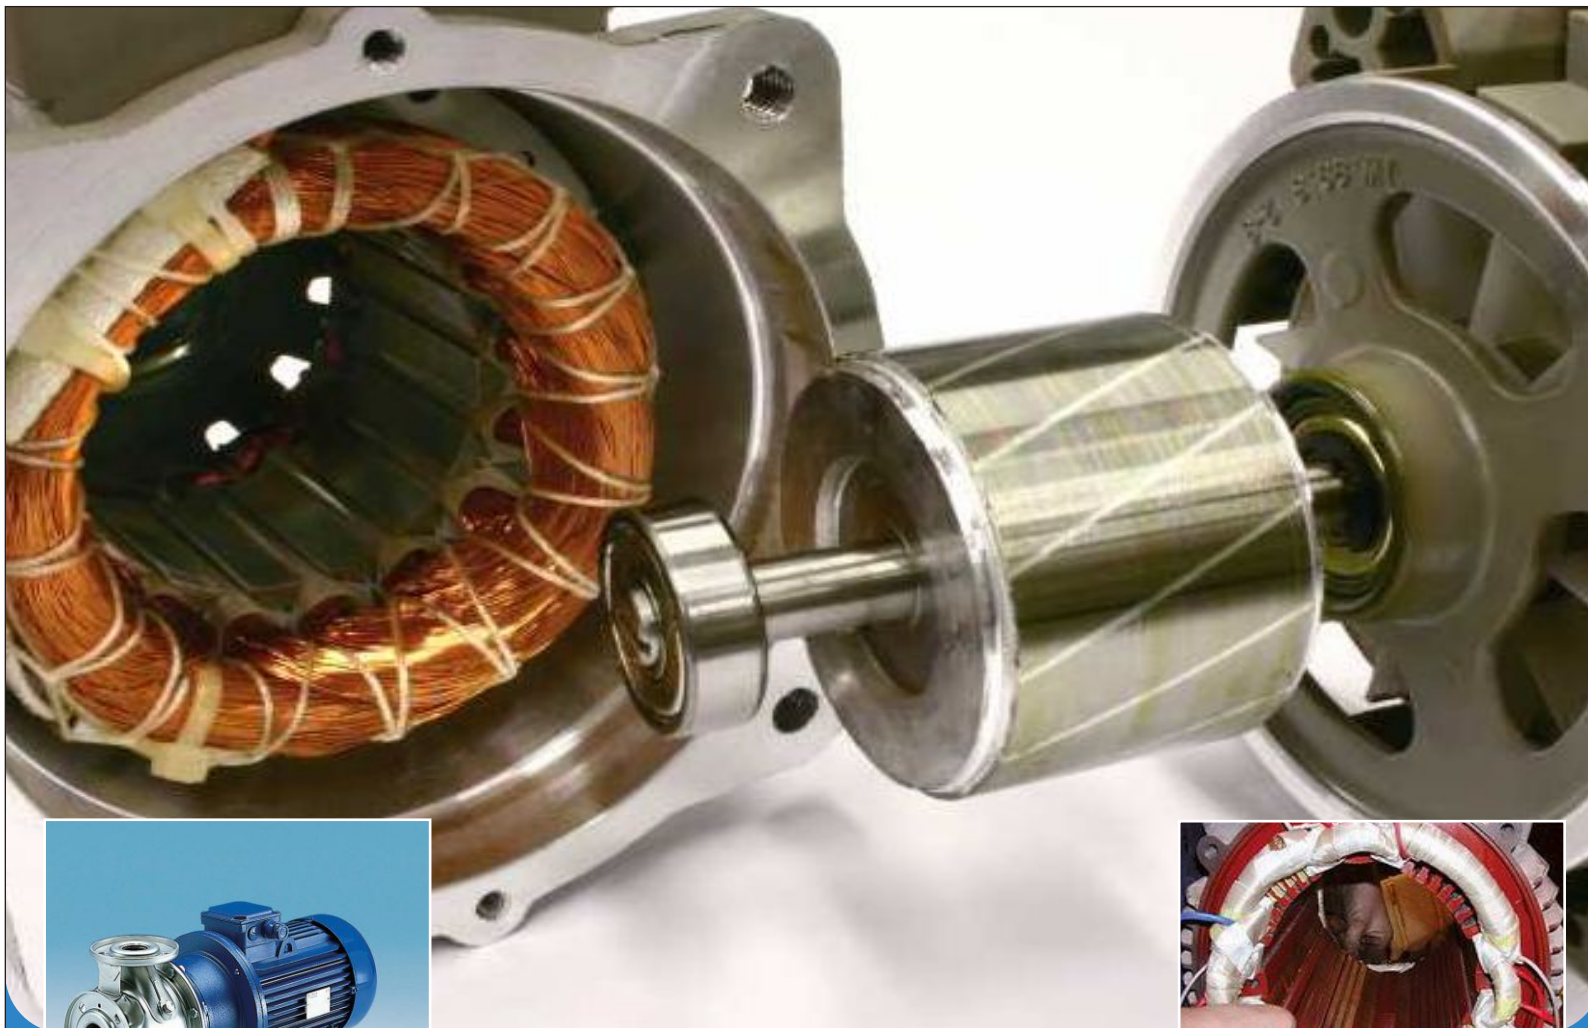

We have at our disposal highly qualified and experienced personnel who can handle and supervise any complex project. We obtain our supplies from world renowned suppliers and manufacturers, utilizing the best as required by our customers.

The team is well experienced in Quality Management and we follow the ISO 9000, OHSAS 18000 guide lines in our management trying to improve continuously.

Services

We try to meet all the customer expectations in providing the electrical and electronic systems required by them to conform to the best engineering practices.

We don't leave the customers after completion of any project. After sales services and revisits are routine for backup and any post operation issues faced by our customers.

Pump & Motor's Services
